Course 2
NSG 520 - Evidence-Based Nursing 2

Course

NSG 520 - Evidence-Based Nursing

In this course, students will review the history of Evidence-Based Practice (EBP) in Nursing and will be introduced to research concepts to evaluate and synthesize literature for EBP. Students will learn how to assess the clinical area to develop and present an EBP proposal for a practice change to optimize care and strengthen outcomes.

Upon completion, students will be able to:

- Examine the history of Evidence-Based Practice to help integrate current and emerging evidence in nursing practice to optimize care and strengthen outcomes (AACN 1.1g, 1.3e, 4.2).
- Analyze practice guidelines to improve the quality of patient care and the care environment (AACN 4.2f, 4.2j, 4.2k).
- Analyze systematic reviews, quantitative, and qualitative research to improve the quality of patient care and the care environment (AACN 4.2f, 4.2j).
- Disseminate the evidence using informatics and communication technologies for practice decisions, including the credibility of sources of information and the relevance to the practice problem confronted (AACN 5.o).

Grade Basis: L
Credit hours: 3.0
Lecture hours: 3.0
Lab hours: 0.0

Prerequisites:

- MTH 245 - Probability and Statistics
