Course

NSG 620 - Translational Research

An emphasis will be placed on the critical examination of current research in the identification and dissemination of best practices for use in professional nursing roles. Content includes quantitative and qualitative research processes, critical research methods, analysis, and ethical aspects of scholarly inquiry. Data analysis techniques will be utilized to translate research into practice. Students will submit a research project proposal to the IRB for approval.

Upon completion, students will be able to:

- Synthesize research literature to integrate, translate, and apply liberal arts with nursing knowledge to improve practice and associated health outcomes for patient aggregates (AACN 1.1, 1.2, 1.3,).
- Analyze the efforts of legal and regulatory processes to promote laws, policies, and regulations to improve nursing practice and health outcomes (AACN 9.4).
- Perform rigorous critique of evidence derived from databases to generate meaningful evidence for nursing practice to create innovational changes across complex healthcare systems (AACN 7.3).
- Select effective communication strategies for disseminating the results of a comprehensive assessment of the evidence for nursing practice changes to strengthen health outcomes (AACN 4.1, 9.5).
- Prepare a research proposal for IRB following core scientific and ethical principles that ensure safe and quality care patient care (AACN 4.3).

Grade Basis: L
Credit hours: 3.0
Lecture hours: 3.0
Lab hours: 0.0

Prerequisites:

- NSG 520 - Evidence-Based Nursing

Restrictions:

- Prerequisite: statistics course.
